The Panel Study of Income Dynamics (PSID) is the world’s longest running national household panel survey. Begun in 1968, the study has collected 40 waves of data from the same families and their descendants over nearly 50 years. More than 10,000 families participate in the PSID, including a refresher sample of immigrant families added in 2017. Because PSID follows descendants of original sample members, the study is a unique source for studying the intergenerational transmission of health & economic wellbeing.

*NEW* data from the **2016 Wellbeing and Daily Life Supplement** (PSID-WB) are now available. PSID-WB provides data from PSID heads and spouses/partners on wellbeing, personality traits, and cognitive skills.

**Child Development Supplement (CDS) & Transition into Adulthood Supplement (TAS)**

- Measures of child/adolescent cognitive, physical, social and behavioral development as well as unique comprehensive national time-use information on children and youth of all ages.

**Original CDS & TAS:** Three waves of CDS data on 3,500 children aged 0-12 from PSID families who were first interviewed in 1997, re-interviewed in 2002 at ages 5-18, and again in 2007 at ages 10-18.

- Six waves of TAS data were collected biennially from 2005-2015 for CDS young adults aged 18 years and older.

**Ongoing CDS & TAS:** A *NEW* round of CDS (CDS-2014) with data from over 4,300 children and caregivers is now available.

- The 7th wave of TAS will collect data in 2017 from young adults ages 18-28 from all PSID families, regardless of their CDS participation.

The vast majority of data are freely accessible through the web-based Data Center which provides customized datasets.

Main sponsorship is provided by the National Science Foundation, the National Institute on Aging, and the Eunice Kennedy Shriver National Institute of Child Health & Human Development.
Training & Funding Opportunities

CTHF is committed to providing exchange opportunities for social science researchers to investigate trends and determinants of healthy aging. ACKNOWLEDGEMENTS

To quote the oft-used phrase “it takes a village” is to understate the metropolis-scaled effort of many members and staff who helped prepare the annual meeting program and its many associated activities. The 2017 Program Committee issued a broad Call for Papers with 120 topics that represented the diversity of population research addressed by demographers, sociologists, economists, political scientists, geographers, historians, epidemiologists, and other health and social scientists. Session Organizers reviewed 3,800 submissions, making difficult choices about what papers to include in the 252 oral sessions. These hardworking committee members and organizers are listed in the printed program and on the PAA web page. The 2017 program has 15 invited sessions, including seven organized by PAA committees. All of the invited sessions focus on some of the most important population issues of our day; and the seven organized by PAA committees showcase issues these committees address throughout the year on PAA’s behalf. The 11 poster sessions were organized by Robert Hummer, with assistance from Elizabeth Lawrence and input from the many session organizers who recommended papers from their sessions for consideration in the poster sessions. The volunteer labor of PAA members has resulted in an exciting program featuring new demographic data, methods, and research.

We regret the U.S. government’s threat of a travel ban that prompted several international colleagues to cancel their attendance. We offer our heartfelt welcome to all PAA attendees, including those from all over the globe; thank you for coming to PAA. A statement of inclusion and welcome to all population researchers is posted on the association’s website.

This is the second year PAA has relied on Confex (Conference Exchange), the commercial conference software that replaced PAMPA, and the bugs are hopefully largely resolved. Nonetheless, there is always room to improve anything that is part of the PAA meeting DNA and we will work with next year’s program co-chairs to continue to improve the user and organizer experiences of Confex.

Danielle Staudt, PAA’s Executive Director, deserves many thanks for managing all the conference logistics, including negotiating free wifi throughout the meeting space and additional perks from vendors and sponsors. Bobbie Westmoreland, Program and Communications Manager at PAA, completed her first full year handling day-to-day and big picture projects to bring us to a fully functioning PAA program. You will see Bobbie and Sheila Evans facilitating the poster sessions over the next three days. We thank Ludy Gonzalez of Confex for serving as our day-to-day point person and participating in our weekly phone calls. We also thank Francesca Morton, Finance and Meeting Manager. We are grateful to our population and department colleagues at Johns Hopkins University and the University of North Carolina at Chapel Hill and to the Bill & Melinda Gates Institute for Population and Reproductive Health, the Hopkins Population Center and the Carolina Population Center for their research, financial and moral support. Last, but not least, we thank the paper and poster contributors, session chairs, discussants, organizers of the member-initiated meetings, and poster judges. The PAA meeting is truly a communal effort. Most of all we thank the PAA members who are the heart and soul of these stimulating meetings. Our field grows with the amazing research that is shared each year.

THE PAA FUND CAMPAIGN

I am pleased to announce that PAA members, friends and supporters help us meet our goal of $1 million raised to match the $1 million in grant monies we received by five distinguished campaigns. As of December 31, 2016, $1,145,323 was raised by over 1700 supporters. In 2016, we raised over $80,000.

Some of these funds have been given in honor of our mentors or colleagues, and some have been contributions. Regardless of the type of gift or the amount, we know the funds are being put to good use supporting congressional policy briefings, expansions of *Demography*, and our international outreach programs. Donations also have supported activities that promote and enhance demographic data and research, educate the public, and improve the PAA’s outreach and member services.

The Honor-a-Colleague program continues to recognize those who have meant so much to our careers. If you would like to make your donation in honor of a mentor, colleague or collaborator, please do so. When gifts in honor of a colleague reach $5,000, the honoree will have his/her name, a short biography and the list of contributors placed on the PAA website. If you are thinking about starting a campaign to honor your mentor or your favorite PAA member, contact Bobbie Westmoreland (bobbie@popassoc.org). The 2017 honorees thus far are Jane Bertrand, Andrew Cherlin, Sidney Goldstein, Devah Pager, Anne Pebley, Suet-Ling Pong, Donald Treiman, Krishnan Namboodiri, Arland Thornton, and Michael White.

Join those who have remembered PAA in their estate plans. Members of the Lotka Society are leaving a Legacy to PAA in their will or other estate plans that will help to ensure the future of the PAA while offering you some valuable tax benefits. Alfred J. Lotka is acknowledged as a founding father of both demography and ecology. If you have questions, call Lois Brown at the number above.

The PAA is an association of kindred spirits and long-cherished professional colleagues. We have gathered resources through this campaign so that the next generation of population scientists will look to the future with enthusiasm and confidence. Although the campaign has enabled us to greatly expand the depth and reach of our work, the PAA continues to rely on financial support. I hope that each of us will continue to do our part.

I thank all of you on the following list for your generous support of the PAA.

Sincerely,

Amy O. Tsui
PAA President

#PAA2018

April 26-28, 2018
Denver, Colorado
MEETING HIGHLIGHTS
Population Association of America
2017 Annual Membership Meeting

Saturday, April 29
8:00 am – 9:00 am
Marquette

Please join the Officers and the Board of the PAA for our annual membership meeting on Saturday morning. This meeting provides an opportunity for members to learn about issues that affect the organization and its members, hear about decisions made by the Board, and get an update on the status of *Demography*, government and public affairs, and other PAA activities.

Please contact Danielle Staudt (danielle@popassoc.org) if you have items to suggest for the agenda or come to the meeting and raise your issues from the floor.

A preliminary agenda is available at the PAA Registration Desk.
Coffee and donuts will be available.

*See you on Saturday morning!*

EARLY CAREER DEMOGRAPHERS RECEPTION

Join fellow early-career demographers for a lively reception. Appetizers and drinks available.

Thursday, April 27 • 6:00 – 7:30 PM
Lake Erie (8th Floor)

China Geo-Explorer (http://chinageoexplorer.org) fully integrates different data sources from government statistics, population census and economics census of China at different levels (province, city, county, township and ZIP code) into a web based spatial system with more than 6,000 comparable variables for easy access.

US Geo-Explorer (http://usgeoexplorer.org) fully integrates the population census and business data of the U.S. from different years at different levels (state, metropolitan, county, CCD, tract and block) into a web based spatial system with more than 40,000 comparable variables for easy access.

China & US Map Library Online, the largest collection of statistical maps with more than 200 million maps for the demographic and business data of US and China. Those maps provide comprehensive information of US and China at various spatial scales (such as state, metropolitan, county, county division, place, tract, and block levels for US and province, city, county and township for China). Users can save the original data in Excel files or export the maps to PDF or PNG graphic files.

Free Mapping Online (http://spatialdataonline.org) offers tens of thousands of free live maps with data from US and China, including census data, business data, land use data, and nighttime light data.

The China Data Center is offering postdoctoral positions jointly with several universities in China with focuses on spatial social sciences, spatial data sciences, unran informatics, and ecological system theory and applications. For more information about open positions and partner opportunities, please visit http://chinadatacenter.org for details and contact China Data Center at (734)647-9610 or chinadatacenter@umich.edu.
